

DRUG FACTS

Active ingredient(s)

Purpose

Use(s)
for weight loss in overweight adults, 18 years and older, when used along with a reduced-calorie and low-fat diet

Warnings

Do not use

- if you are taking cyclosporine
- if you have been diagnosed with problems absorbing food
- if you are not overweight

Ask a doctor before use if you have

- gallbladder problems
- kidney stones
- pancreatitis

Ask a doctor or pharmacist before use if you are

- taking warfarin (blood thinning medicine), or taking medicine for diabetes or thyroid disease. Your medication dose may need to be adjusted.
- taking other weight loss products

When using this product

- take a multivitamin once a day, at bedtime. orlistat can reduce the absorption of some vitamins.
- follow a well-balanced, reduced-calorie, low-fat diet. Try starting this diet before taking orlistat.
- orlistat works by preventing the absorption of some of the fat you eat. The fat passes out of your body, so you may have bowel changes. You may get:
- gas with oily spotting
- loose stools
- more frequent stools that may be hard to control
- eating a low-fat diet lowers the chances of having these bowel changes
- for every 5 pounds you lose from diet alone, orlistat can help you lose 2-3 pounds more. In studies, most people lost 5-10 pounds over 6 months.

Stop use and ask a doctor if
severe or continuous abdominal pain occurs. This may be a sign of a serious medical condition.

If pregnant or breast-feeding

Keep out of reach of children

Directions

- read the enclosed brochure for other important information
- diet and exercise are the starting points for any weight loss program. Try these first before adding orlistat. Check with your doctor before starting any exercise program.
- to see if orlistat capsules are right for you, find your height on the chart to the right. You may consider starting a weight loss program with orlistat if your weight is the same or more than the weight shown for your height.
- for overweight adults 18 years and older:
- take 1 capsule with each meal containing fat
- do not take more than 3 capsules daily
- use with a reduced-calorie, low-fat diet and exercise program until you reach your weight loss goal. Most weight loss occurs in the first 6 months.
- if you stop taking orlistat, continue with your diet and exercise program
- if you start to regain weight after you stop taking orlistat, you may need to start taking orlistat again along with your diet and exercise program
- take a multivitamin once a day, at bedtime, when using orlistat
